

Meet the SEAC:

Khristine Maraganis

Special Education

Contact Information:

kmaraganis@lowell.sabis.net

978-458-1399

I am the Special Education Academic Coordinator. I will be in charge of making sure student receive the services they need to overcome barriers they may have in learning due to an identified disability. I have been a Special Educator for over 20 years now and I am currently working on my doctorate in Educational Leadership.

Special education is provided to our students who have undergone evaluations and have been identified as having a disability that impacts their learning. Special education teachers will instruct students using evidence based strategies to assist students in reaching the goals on their Individualized Education Plans (IEP). The special education teachers will also collaborate with the students' general education teachers to create an all inclusive support system to help the student succeed.
